Stick & stitch sheet

Dachshund · 489 backstitches + 7 small fills · 2 strands of black thread · fits a 6 in hoop

Cut on the dashed line

Practice piece: stitch and rinse this on a scrap first

How to use it

1. Print at 100% ("Actual size") on the soft side, not the paper backing. Try plain paper first and measure the 1-inch bar.
2. Cut on the dashed lines. Fold your fabric in quarters and crease it to find the middle.
3. Peel off the backing and smooth the sheet onto the fabric, lining up the 4 small marks with the creases. Hoop it drum-tight.
4. Stitch right through the sheet, in and out at the dots. Fill the striped spots (eyes, nose) with small side-by-side stitches. If the needle gets sticky, wipe it clean.
5. Trim the extra sheet near your stitches, soak in lukewarm water until it's gone, rinse, and lay flat to dry.

1 inch. If this isn't 1 inch on your ruler, print again at 100%.
